Education

Helwan University

Bachelor's Degree in Computer Science

Sep 2020 – Jun 2024

GPA: 3.4

Experience

Banyan Co

Software Engineer

Jan 2025

Cairo

- Developed and maintained medical solutions using **.NET** to assist pharmacies in optimizing their operations.
- Integrated backend services** with frontend technologies like **React** and **Tailwind** to enhance performance and responsiveness.
- Worked closely with **cross-functional teams** to deliver feature-rich, high-quality **software solutions**.
- Demonstrated strong teamwork and communication skills by collaborating with peers in group activities and presentations.

Taza Company

Software Engineer Intern

Jul 2024 – Nov 2024

Cairo

- Developed and maintained **back-end** services using **ASP.NET**.
- Integrated back-end services** with **front-end** technologies like **React** and **Tailwind** to achieve high performance and responsiveness.
- Implemented responsive **web** designs using **HTML**, **CSS**, and **React** to enhance user experience across devices.

Projects

PC-Builder | *Python, Postgres, React, .Net, EFCore*

Oct 2024

- Developed a Multi-Store PC Builder that aggregates product data using **Python scraping**, saving time for users.
- Stores data in an optimized **relational database** for fast and efficient retrieval.
- Built a responsive **UI** with **React** and **Tailwind CSS** for a seamless user experience.
- Optimized **data processing and caching** to enhance performance and scalability.
- Enables real-time product search and price comparison across multiple sources.

Taza Menus Platform | *.Net, EFCore, React*

Jul 2024

- Developed a Smart Order Management SaaS for restaurants and coffee shops, reducing queue times by **30-50%**.
- Designed to handle **300+** concurrent users efficiently with a scalable, stateless **RESTful API** and clean architecture.
- Implemented **repository-based DB access** and service layers for structured business logic.
- Secured with strong validation, rate limiting, **RBAC-based access control**, and **JWT** authentication.

Sheets Saver | *.Net, EFCore, Postgres, MultiThread*

Oct 2024

- Built a **web** application that efficiently stores large Excel data in a short time.
- Developed a **multithreaded processing system** with batch handling for high-speed data insertion.
- Optimized performance using **EF Core**, achieving a **70-90%** improvement in processing time.
- Ensured scalability and smooth data interaction for handling large **datasets**.

Technical Skills

Languages: Python, Java, C, C++, C#, HTML, CSS, JavaScript, SQL

Concepts : Object Oriented Programming, Problem-Solving, Algorithms, Data Structures, MVC

Technologies : React.js, TypeScript, PostgreSQL, Docker, Git, Linux, ORM, ASP.NET, Node.js, Electron.js

Leadership / Extracurricular

ECPC

Spring 2023 – Spring 2024

- Qualified in 2022/2023 and 2023/2024 to Egyptian Collegiate Programming Qualification (ECPC).
- Getting the **Second place** in Helwan in 2023 and **fourth place** in 2024
